CREATING ANAMORPHIC-LIKE COLORED STREAK EFFECTS

Description
The Schneider-Kreuznach True-Streak® filter is designed to create the effect of a scene or image that has been recorded with an anamorphic lens and then displayed using a complementary reverse projection lens. The filter offers an exciting way to simulate the anamorphic streak effect with virtually any lens, anamorphic or not. Within the filter's glass is a combination of fine line tubes whose action is limited to point light sources. Upon those light sources, such as the sun, a light bulb, or a candle, long colored streaks emanate. This results in prominent, elongated streaks that are symmetric from each point light source to draw attention to a specific part of the frame, or to create a visually dramatic look. Flares will rotate with changing the orientation of the filter.
Key Feature
• Simulate the anamorphic streak effect • 4 strengths 1mm (strongest effect), 2 mm, 3 mm and 4 mm (most subtle effect) • 5 different colors
USP
Creates sharp, brilliant-colored streaks
Application
A creative way to enhance night exteriors, highlight reflections off chrome surfaces, "WOW" them with vibrant rock'n'roll illumination or achieve other stand-out imagery to liven the look with stunning vintage effects.

Colors	Strength
Blue, Clear, Indigo, Red, Yellow	1 mm, 2 mm, 3 mm, 4 mm
Sizes Plates	**Size Screw-In**
4x4", 4x5.65", 6.6x6.6"	M77
Thickness Plates	**Thickness Screw-In**
4 mm	2.7 mm
